

AI in your day-to-day operations

For small and mid-sized firms: two or three points in the working day where time is lost, automated with AI agents - not a large AI project.

WHAT IS INCLUDED

- Process review first: we name where automation pays and where it does not
- AI agents that take enquiries, follow up and book appointments
- Voice agents that pick up the phone when nobody in the office can
- Quotes, invoices and scheduling handed between your systems automatically
- Website with an AI chatbot: answers around the clock, hands over to a person
- GDPR-compliant, with a data processing agreement
